ABSTRACT

A list of college programs and a history of the University of Kentucky Community College System (UKCCS) begin this presentation and analysis of 1986-87 data on UKCCS enrollments, instructional programs, financial support, and student characteristics. Section I focuses on enrollment, providing fall 1986 headcount enrollment for each of the 14 UKCCS campuses in terms of enrollment status (full-/part-time), class, sex, and residence; full-time equivalent (FTE) enrollments for fall 1964 and fall 1977 through 1986; and headcount enrollments for first-time freshmen for fall 1969 and fall 1976 through 1986. Section II examines headcount enrollment by degree level; program enrollment by gender; credit hours offered and FTE enrollment by degree and course level; UKCCS graduates by degree, college, and program; number and type of library materials supporting the instructional programs; educational level of full-time teaching staff; and staff and faculty development activities. Section III analyses the financial support base of UKCCS, detailing general fund expenditures by function, expenditures from recurring general funds, general funds budgeted by function, and average faculty salaries by rank. Section IV examines the family income, ethnic status, and age of fall 1986 freshmen and compares their mean standardized test scores with those of similar groups in 1977 through 1985. (EJV)

DEVELOPMENT OF THE COMMUNITY COLLEGE SYSTEM

In 1962 the General Assembly of Kentucky, through the leadership of Governor Bert T. Combs, enacted legislation mandating the formation of a system of community colleges and entrusted the Board of Trustees of the University of Kentucky with the operation of such a system. At the same time, the legislature recommended five sites for future colleges.

There are two reasons for giving the operation of the system to the University of Kentucky Board of Trustees. The first was the recognition that as the governing board of the state's land grant university, the University of Kentucky Board of Trustees already had the responsibility for the planning and operation of state-wide programs. The second reason was the recognition of the existence of the five extension centers then being operated by the University of Kentucky. Between 1948 and 1962, the University of Kentucky had opened four extension centers at Covington, Cumberland, Fort Knox and Henderson and assumed the responsibility of the municipally run Ashland Junior College.

In creating a system of community colleges, the 1962 General Assembly abandoned the extension center philosophy of the program then operated by the University of Kentucky and committed the state to a comprehensive community college program. A threefold function of career-oriented technical programs, pre-baccalaureate education and adult-continuing education was called for in the enabling legislation.

In July 1964, the University of Kentucky, guided by the leadership of its sixth president, Dr. John W. Oswald, provided for both the operation of a University System and a Community College System under the Board of Trustees. The Community College System operates as an autonomous system

with the determination and administration of its academic programs separate from those of the University System. The chief administrative officer of the Community College System is a Chancellor who is directly responsible to the President of the University.

New community colleges opened at Elizabethtown and Prestonsburg in 1964, bringing the total number of campuses under the new System to seven. Total enrollment that fall was 2,876 students; an increase of 67 percent over the previous year. Then in 1965 new community colleges opened at Hopkinsville and Somerset.

The Community College System continued its growth in all respects after 1964. After studies in 1965 and 1967 regarding the need for additional community colleges, recommendations concerning criteria to be used in establishing new community colleges were made to the University of Kentucky Board of Trustees. These criteria were adopted by the Board and submitted to the Council on Higher Education -- the state's coordinating and planning body for public institutions of higher education. Acting on the Council's recommendation, the General Assembly amended the Community College Act to recognize the Lexington Technical Institute, which had been operating on the University campus since August 30, 1965; and to authorize new community colleges at Louisville and Maysville in 1966, one at Hazard in 1967, and the last one at Madisonville in 1968. These latter four units were subsequently established and opened for students in 1968.

In July 1968, Paducah Junior College, a municipally operated college founded in the 1930's, joined the Community College System as Paducah Community College. This brought to fifteen the number of units then operating under the University of Kentucky Board of Trustees.

In January 1970, the General Assembly of Kentucky, recognizing the need for additional higher education opportunities in the Northern Kentucky area, authorized the creation of a four-year college, Northern Kentucky State College. The facilities of the Northern Community College, operated since 1948 by the University of Kentucky, were as of July 1, 1970, transferred to the administrative control of the newly-formed Northern Kentucky State College. This reduced to fourteen the number of units operating under the University of Kentucky Community College System.

Effective with the 1972 Fall Semester, the Fort Knox Community College was changed to a four-year residence instruction center which is under the administrative control of the University of Kentucky Dean of Extension. Also in the Fall of 1972, a sub-unit of Jefferson Community College began operation. The Southwest Campus of Jefferson Community College was opened in response to the request for more educational opportunities made by the citizens of the Southwest section of Jefferson County. The operation was temporarily housed in a high school - primarily operating in the late afternoon and evening hours and serving mainly part-time students. A permanent facility was designed and constructed and the new campus was officially opened during the summer of 1980.

In 1968, the General Assembly authorized the establishment of two additional community colleges, at Glasgow and Carrollton; however, funds were never appropriated for their activation.

The University of Kentucky Board of Trustees in December, 1983, changed the status of the Lexington Technical Institute to that of a community college. Effective July 1, 1984, the Institute became Lexington Community College. Transfer programs were added to the offerings which, formerly, had been limited to technical programs.

In the Fall of 1984, a sub-unit of Henderson Community College was opened at Owensboro. The Owensboro campus of Henderson was authorized by the 1984 legislature. Then in 1986, the legislature approved a separate community college for Owensboro. As a result, the Owensboro campus of Henderson Community College became Owensboro Community College effective July 15, 1986.

At the present, the University of Kentucky Community College System is comprised of 14 community colleges. One of these colleges, Jefferson, has two campuses.

SECTION I

ENROLLMENT

The number of students enrolled in the University of Kentucky Community College System during the 1986 Fall Semester is presented in Tables 1 through 4, and an enrollment history is presented in Tables 5 through 7.

The headcount credit enrollment of 25,569 students is shown in Table 1. This enrollment represented a numerical increase of 1,802 students from the 1985 Fall enrollment of 23,767. In comparison, there was a numerical increase in 1985 of 25 students from the 1984 Fall enrollment of 23,742 and a numerical decrease in 1984 of 317 from the 1983 Fall enrollment of 24,059.

There was a marked numerical decrease in 1978 of 1,683 students from the 1977 Fall enrollment of 17,511. The decrease in headcount enrollment in 1978 can be partially explained by a drop in the number of high school graduates and by a substantial number of students losing eligibility for Pell Grants due to lack of satisfactory academic progress. The increases in 1979-1983 are due, in part, to an increasing number of older students. Also, due to the state of the economy, some individuals may have been seeking higher education in lieu of entering directly into the work force. On the other hand, the slight decrease in 1984 may have resulted from an improved economy as more individuals opted to work rather than pursue additional education.

Of the total 1986 enrollment, 10,967 were full-time (42.9%), 14,602 were part-time (57.1%), 14,018 were freshmen (54.8%), 6,009 (23.5%) were sophmores, and 5,542 (21.7%) were non-degree students.

The ratio of freshmen to sophomores remained relatively unchanged from the previous four years and is typical of most community colleges in that the retention rate of sophomores is generally low. Fifty-four percent of the freshmen, 44 percent of the sophomores, and 13 percent of non-degree students were full-time students.

The number of men and women enrolled is shown in Table 3. Of the students enrolled, 9,022 (35.3%) were men and 16,547 (64.7%) were women. This was about the same percentage of men and women as in 1985. The proportion of women to men had been increasing for several years. Forty-eight percent of the men in 1986 were enrolled as full-time students, and 40 percent of the women were enrolled on a full-time basis. These percentages for full-time men and women were about the same in 1985. In general, however, the percentage of full-time student enrollments has declined over the last decade even though the actual number of students has increased.

The number of students enrolled in the Community College System by place of residence is shown in Table 4. In 1986, 379 students were non-residents of Kentucky or foreign. This means that 99 percent of those students receiving credit instruction in the 1986 Fall Semester were Kentucky residents.

Enrollment History

Tables 5 through 7 present a history of enrollment in the University of Kentucky Community College System. Table 5 shows the

headcount enrollment in 1964 when the System was established and for the ten year period, 1977-1986. Table 6 provides similar information about the full-time equivalent enrollment. Table 7 indicates the number of first-time freshmen enrollees in 1969 and from 1976-1986.

Beginning with 1964, credit enrollment increased from 2,876 students in seven colleges to 17,511 in thirteen institutions in 1977. In thirteen years, this meant a numerical increase of 14,635 students and a percentage increase of 509. Over 85 percent of this growth occurred in the eight colleges started after 1964 and five remaining original colleges accounted for only 29 percent or 5,022 students of the total enrollment as of Fall, 1977. In 1978, however, the enrollment dropped to 15,828 students. This was a decline of 1,683 from 1977 which represents a decrease of almost ten percent. The decline occurred in a number of the colleges but was most evident at Jefferson Community College where there was a decrease of 1,183 students. The total enrollment in 1979 of 17,135 students was still 376 below the high of 17,511 students reported in 1977. In 1980, however, the enrollment increased to 19,245 students. This was an increase of 2,110 students over 1979, an increase of 12 percent. In 1981, 20,373 students were enrolled, an increase of 1,128 students or a six percent increase over 1980. An all time high for the System was reached in 1982 with 22,116 enrolled, an increase of 1,743 students over 1981 or an increase of eight percent. In 1983, a record was set with a total of 24,059 students enrolled. This was an increase of 1,943 students over 1982, an increase of nine percent. A slight decrease in headcount enrollment was experienced in 1984 and 1985. In 1986, however, a new enrollment record of 25,569 students was set.

Table 6 indicates the full-time equivalent credit enrollment for 1964 and 1977-1986. The full-time equivalent (FTE) computation is based on the total credit hours for which students are enrolled, divided by 16. Prior to 1973, the ratio was 16 to 1 and from 1973 to 1982 the ratio was 15 to 1. The total FTE credit enrollment for Fall 1986 was 14,338, a System record. This was a numerical increase of 901 over the Fall 1985 FTE enrollment of 13,437. A record FTE enrollment was previously set in 1983 when 14,168 was reported. Beginning with 1964, FTE credit enrollment in the Community College System, calculated on a 15:1 ratio, had increased from 2,084 to 11,732 in 1977 reflecting a growth of 463 percent. A decrease in 1978 represented a decline of nearly 13 percent in FTE enrollment from 1977. An increase in 1979 narrowed that decline to five percent. Another increase in 1981 represented a 13 percent increase over 1977. The 1982 increase of 843 was an increase of six percent over 1981. Even with the change in ratio to 16 to 1 in 1983 there was an increase of 114 FTE students over 1982. The decline in 1984 of 620 represented a four percent decrease from 1983 and the decline between 1985 and 1984 was less than one percent.

First-time freshmen enrollment, as seen in Table 7, accounted for 23 percent of the total enrollment and represented 42 percent of the freshmen enrollment of 14,018. Since 1969, the percentage of first-time freshmen in relation to the total enrollment has ranged from a low of 18 percent in 1983 to a high of 40 percent in 1970.

SECTION II

INSTRUCTIONAL PROGRAMS

The University of Kentucky Community College System is committed to the development of a comprehensive educational program with emphasis upon both transfer and career or technical programs. The technical programs which prepare the student for job entry upon graduation are designed to be completed in two years. Information relating to the distribution of enrollment is provided in Tables 8 through 17. The number of graduates in these programs is detailed in Tables 18, 19, and 20. Table 21 provides information pertaining to the library holdings which support the instructional programs. An analysis of the degrees held by the full-time teaching faculty is found in Table 22. And, staff and faculty development activities are detailed in Table 23.

An analysis of the headcount enrollment by degree program is shown in Tables 8 through 12. As shown in Table 8, 8,490 (33.2%) of the students were in transfer programs which lead to an Associate in Arts or Associate in Science degree while 11,537 (45.1%) were enrolled in technical programs which lead to an Associate in Applied Science degree. The remaining 5,542 (21.7%) were mostly part-time students who had no degree objective. Of the students enrolled in the transfer programs, 5,371 (63.3%) were full-time, while in the technical programs, 4,879 (42.3%) of the enrollment was full-time.

Table 9 provides information on the change in enrollment between 1985 and 1986. There was an increase in transfer enrollment in 1986 at all institutions except Henderson Community College. In 1985, all institutions experienced an increase in transfer degree enrollment except Ashland, Hazard, Hopkinsville, Jefferson, and Somerset.

Decreases in technical degree enrollment were experienced in 1986 at Ashland, Elizabethtown, Henderson, Jefferson, Lexington, and Madisonville. Non-degree students increased at all colleges in 1986 except Ashland, Elizabethtown, Henderson, Maysville, Prestonsburg and Somerset. The percent of change in transfer enrollment ranged from an increase of 50.1 percent at Lexington to a decrease of 38.1 percent at Henderson. The percent of change in technical enrollment ranged from an increase of 30.6 percent at Somerset to a decrease of 34.9 percent at Henderson. The decreases at Henderson were due to the Owensboro campus of Henderson becoming a separate college in July, 1986. System-wide there was an increase of 22.8 percent in transfer enrollment and a decrease of less than one percent (.4) in technical enrollment. The greater percentage of students enrolled in technical programs, 45.1 percent, compared to 33.2 percent enrolled in transfer programs, continued a trend which began in 1971 when 68 percent of the students were enrolled in the transfer programs. The percentage of non-degree enrollment in 1986 was about the same as in 1985, 21.7 percent and 22.2 percent respectively.

A comparison of Tables 10 and 11 indicates that, on a percentage basis, more men in comparison to women were enrolled in the transfer programs than in technical programs. Of the students pursuing a transfer degree, 3,823 (45.0%) were men and 4,667 (55.0%) were women. Of the 11,583 students in the technical programs, 3,281 (28.4%) were men and 8,296 (71.9%) were women. More women 3,624 (65.4%) than men, 1,918 (34.6%), were enrolled as non-degree students (Table 12).

The credit hour production by degree level is shown in Table 13 and the comparable full-time equivalent enrollment is presented in Table 14. The FTE enrollment is computed by dividing the number of credit hours by 16. Of the 14,339 FTE students, 5,901 were in the transfer programs while 5,995 were in technical programs and 2,443

were non-degree. The difference between the percentage ratios of transfer and technical enrollment by headcount (Table 8) and full-time equivalent (Table 14) is partially explained by the greater number of part-time students in the technical programs.

Tables 15 through 17 provide information on the enrollment by course level as differentiated from student degree level. As seen in Table 16, the full-time equivalent enrollment was 8,564 in transfer level courses and 5,774 in technical level courses. This was due primarily to the fact that approximately one-half of the course work in technical degree programs consists of general education and courses which are reflected in the transfer course enrollment.

Analyses of graduates of the University of Kentucky Community College System are shown in Table 18-20. Associate in Arts and Associate in Science degrees are awarded to students in transfer programs who successfully complete, with at least a "C" average, one of the specified curricula, all of which require at least 60 semester hours. The Associate in Applied Science degree is awarded to students successfully completing technical programs. These programs are intended to lead to immediate employment upon graduation. Table 18 indicates that of the 2,613 students who received an associate degree during the 1985-86 academic year, 932 (35.7%) were in the transfer programs while 1,681 (64.3%) were in the technical programs.

The program areas in which the Associate in Applied Science degrees were awarded are shown in Table 19. There were graduates from forty of the technical programs or program specializations offered in the Community College System. Of the Applied Science degrees, 502 (29.9%) were in Nursing and 290 (17.3%) in Business Management. In terms of the broad curriculum areas, the Nursing and Allied Health areas dominated with a total of 650 (38.7%) of the degrees.

A history of the number of degrees and certificates awarded in the University of Kentucky Community College System from 1979 through 1986 is presented in Table 20. The Community College System has discontinued the Certificate of College Studies which was last awarded in 1974. Effective with the 1974-75 academic year the minimum number of credit hours required for the Associate in Arts and Associate in Science degrees was reduced from sixty-four to sixty. The 2,617 degrees awarded during 1984 represented a high for the System. The 2,613 degrees awarded during 1986 was four short of the 1984 record.

Table 21 presents information relating to the number and type of library materials supporting the instructional programs. Increases in both print and non-print units were reported by the colleges for 1985-86. A number of colleges are developing sizable collections of microform and other non-print units. A library to support the technical offerings of Lexington Community College, previously the Lexington Technical Institute, is under development. In addition, Lexington Community College students have access to the University of Kentucky campus libraries.

An indication of the educational level of the full-time teaching faculty is shown in Table 22. Of the 760 full-time teaching faculty members, the majority, 589 (77.5%) had a masters degree while 79 (10.4%) had a doctorate and 92 (12.1%) had a bachelors or less.

As in the past few years, staff and faculty development in the University of Kentucky Community College System in 1986-1987 was supported by systemwide conferences, orientation programs, assistance grants, and by similar in-service programs and grants operating in the individual colleges in the System. In addition, participation by the faculty and staff in external professional associations and meetings was encouraged and

financially supported, along with a limited number of sabbaticals and leaves of absence. All of the fourteen colleges also participated in the Teaching Improvement Process (TIP), a consulting service provided to faculty who wish to analyze their teaching and implement changes.

Table 23 shows participation in faculty development activities by college. As shown in Table 23, 255 in-service programs were conducted within the Community College System in 1986-1987 and 76 faculty participated in TIP. The Community College System Office also granted 20 Summer Teaching Improvement Fellowships, totaling $10,800, to assist faculty in improving and revising course materials and twelve faculty were awarded sabbatical leaves.

In addition to these activities, systemwide workshops and conferences were hosted by the Community College System for TIP teaching consultants, division chairmen, English faculty, allied health faculty, and science faculty.

Table 24 presents information relating to the continuing education and community service activities offered during 1985-86. A total of 227,627 persons were involved either in continuing education or community service activities during this period. The community colleges awarded approximately 20,000 CEUS to 20,344 participants. The college facilities were heavily used (N = 28,391 facility hours) by 207,283 community sevice participants.

SECTION III
FINANCIAL SUPPORT

Nationally, community/junior colleges have five major sources of revenue for operating funds--local tax support, state support, federal funds, student fees, and private gifts and grants. The major sources of revenue for the University of Kentucky Community College System include: state support, student fees, federal grants, and restricted gifts and grants. Two colleges benefit from local taxes that provide limited support for enrichment programs.

1985-86 Expenditure Data

General fund expenditure data for 1985-86, categorized by college and major function, are included in Table 25. Expenditures (recurring and nonrecurring) for the major functions totaled $35,632,827 for 1985-86. These funds were expended in support of 13,556 student FTE, which represents an average expenditure of $2,629 per full-time student equivalent. Percentage data for 1985-86 expenditures are included in Table 26.

It should be noted that several components of general fund expenditures have been omitted from Table 25 because they were budgeted in/expended from System-wide and University-wide accounts. These exceptions include major items outlined below, which could reasonably be included in a determination of average expenditure per student FTE.

1. Lexington Campus Support ($1,495,700) -- Allocated expenditures for direct program support provided by organizational units on the Lexington Campus and for general support provided by University of Kentucky administrative offices.

2. Plant Fund Projects ($1,850,777) -- Funds committed to major repair and renovation projects throughout the Community College System during fiscal 1985-86.

3. Debt Service Requirements ($2,425,109) -- Expenditures associated with building revenue bonds used to fund capital construction projects completed throughout the Community College System in recent years.

4. Other System Support ($1,433,840) -- Expenditures incurred for administrative activities at the Community College System: automobile insurance for System vehicles, System-wide committees, various scholarships, student health insurance, and data processing expenditures associated with a centralized student data system.

The inclusion of these support expenditures, amounting to $7,205,426 for 1985-86, increases total expenditures for 1985-86 to $42,838,253, and average expenditure per student FTE to $3,160.

1986-87 Budget Data

Tables 27 and 28 include recurring budget data for 1986-87. For the System as a whole, $35,132,515 was budgeted for major functions including recurring funds budgeted for capital items.

1986-87 Salary Data

Salary data included in Table 29 indicate the average ten-month salary for full-time faculty, by rank and by college. Data in parentheses indicate the number of faculty at each rank for each of the individual colleges.

These data were prepared in accordance with guidelines established for the annual HEGIS salary survey conducted in the Fall of 1986-87, which means that individuals who held faculty rank and devoted a minimum of 50 percent of their time to the instruction function were included in the survey regardless of the source of funding for their positions. Administrators, librarians, and counselors were excluded from the survey in keeping with survey guidelines. It should also be noted that fringe benefits were excluded from the salary data.

SECTION IV

STUDENT CHARACTERISTICS

An indication of the academic characteristics of first-time freshmen in the University of Kentucky Community College System is represented by the scores on the American College Test. The American College Test or the ACT Career Planning program is required of all entering students who have no previous college work and are enrolled in a degree program. The ACT is a national achievement test which yields standard scores in the areas of English, mathematics, social sciences, natural sciences, and a composite score. It is used by all the public institutions of higher education in the state as a counseling and placement device. Students enrolled in technical degree programs or who have been out of high school for several years may take the ACT Career Planning Program instead of the American College Test. The ACT Career Planning Program is designed to help students relate their interests and abilities to educational and career planning.

The mean ACT standard scores for each of the four tests and the composite score for all entering students in the Fall, 1986, is shown by college in Table 30. A total of 2,944 students were included in the results. The mean composite ACT score varies from a high of 17.6 at Paducah Community College to a low of 13.4 at Southeast Community College and the downtown campus of Jefferson Community College. The mean composite of 15.2 for the System as a whole is generally lower than the mean composite for the state of Kentucky. The differences between male and female students are shown in Tables 31 and 32. The mean composite score of 16.2 for men is higher than the mean composite score of 15.2 for women. A comparison of the mean scores for community college students since 1976 can be seen in Table 33. The composite mean for the System of 15.3 for 1985 is

the lowest composite mean during the ten-year period, 1977-1986. During the same period, the highest composite mean was 16.0 in 1977. The mean on the mathematics test has declined over most of the ten-year period from a high of 13.7 in 1977 to a low of 12.1 in 1985. The 1986 figure of 12.3 was a slight increase. On the English test, a low mean of 16.1 was recorded for 1977 and 1985 and a high mean of 16.5 was reached in 1979 and 1986. Means of the social sciences and natural sciences tests were highest during the ten-year period in 1977, 15.0 and 18.7 respectively.

Information concerning the estimated family income is found in Table 34. Six percent of the students in the System reported less than $6,000 annual family income and eight percent reported an annual income between $6,000 and $11,999. Ten percent reported incomes between $12,000 and $17,999. Fifty-four percent reported incomes over $18,000. Twenty-two percent of the students did not report family income.

The ethnic background of the students enrolled in the Community College System is found in Table 35. The overwhelming majority of the students are Caucasian (Other) - 23,485 (91.8%) - with the next largest ethnic group being American Black - 1722 (6.7%). The largest American Black percentage occurred in 1977 when 14 percent of the students were reported as Black minority. Approximately seven percent of the population in Kentucky is American Black.

The distribution of headcount students by age groups is shown in Table 36. The 11,097 (43.4%) students 26 years of age or older comprise the largest category of students by age in the Community College System. There are 7,506 (29.4%) students under 20 years of age and 6,966 (27.2%) in the 20-25 year range. This is the eighth year in succession that the number of students age 26 and older is greater than those under twenty years of age.
